QUALITY TRUCK BODIES

DELIVERING A HIGHER STANDARD

Rockport

CARGOPORT

Vehicles shown with optional equipment.

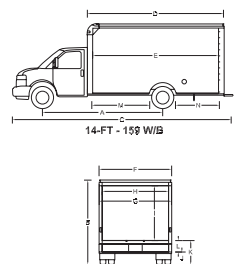

LOWEST FLOOR HEIGHT IN THE INDUSTRY

Built for the value minded operator whose focus is a well-constructed cargo box with functionality as the main aspect. Low entry height, multiple side and rear door configurations, and optional shelving and cargo control packages make the Cargoport the logical choice for vocations that include multi-stop deliveries. The Cargoport affords the operator the flexibility to customize this unit creating a vehicle that is tailored to your specific needs.

WORKPORT

Vehicles shown with optional equipment.

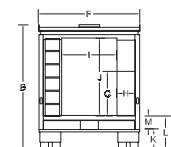

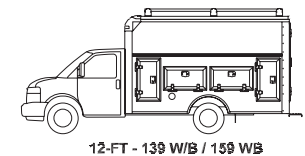

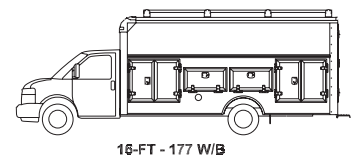

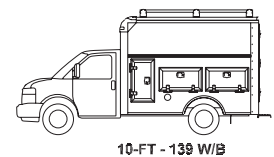

ENCLOSED SERVICE BODY; RUGGED INSIDE AND OUT

A true workshop on wheels, the ergonomically designed Workport provides both an exceptional and functional way to service your customers. Stand-up interior height, heavy duty door hinges, integrated rear access ladders and Tuffply rubberized flooring are just a few standard features favored by our customers. The exterior compartments provide ease of access to cargo with the convenience of available power locks to keep your valuables secure at the push of a button. The flexible Workport can be tailored to your specific needs with available shelving, lighting, interior accessibility, cargo control and many other optional features that make this product truly unique to your line of work.

QUALITY OPTIONS COME STANDARD

With quality and flexibility at the forefront, Rockport has raised the bar higher with customer preferred innovations and enhancements built into every Rockport body. Customize “The Rock” with Aluminum or FRP sidewalls, Aluminum or Translucent roofing and various flooring options that include Laminated Hardwood with interlocking joints, AB Grade plywood for maximum strength, Extruded Aluminum Planks, and Steel or Aluminum Treadplate Overlay for easy clean up. Many other available options allow you to create “The Rock” in a way that best suits the needs of your specific application for many years of reliable service.

ADDITIONAL CUBIC FOOTAGE WITH LOWERED REAR DECK

Designed around a focus group of operators, the Parcelport was created from feedback within the Parcel Delivery industry. Operators shared their experiences about products they use daily and pinpointed what worked for them and what didn't. We listened, took notes and brought the Parcelport to market with standard features such as the Rocktop fiberglass wind fairing for increased fuel economy, reduced wind resistance and an overall clean, finished appearance, Tuffply rubberized flooring to keep cargo clean, dry and provides increased foot traction, translucent roofing for increased interior light, and an exclusive 29" aluminum rear drop floor for a lower ease of entry. Available side and rear door options and various shelving packages ensure that the Parcelport is the perfect fit for you.

ABOUT ROCKPORT QUALITY TRUCK BODIES

In 2002, Rockport Commercial Vehicles was founded in Elkhart, Indiana, as part of Forest River's vision to build a superior commercial vehicle. Our humble beginnings started with just a few cutaway chassis and has since become one of General Motors fastest growing bailment pools. Now Rockport has one of the most extensive selections of chassis configurations in the industry with inventories of Chevrolet & GMC cutaway chassis. Our key leadership team is comprised of experienced individuals that collectively share over 100 years of commercial body manufacturing experience. Each of our diverse and complimentary team experts provide a foundation that Rockport utilizes to create our customer-friendly designs & delivery schedule. Our financial strength with Berkshire Hathaway and Forest River is your assurance that we will be here to serve you for years to come. Understanding the importance of quality, we chose to locate our manufacturing facilities near our other existing Forest River cargo trailer manufacturing sites. These locations have experienced management resources, craftsman with a proven work ethic and a commitment to quality.
